

This is a survey about the public health role of certified medical examiners (CME) in the detection and treatment of diabetes and high blood pressure.

We ask that you return your statistics on whatever schedule would be convenient for you: weekly, biweekly, or monthly.

You have been asked to participate because you are member of TeamCME (which lists 767 CMEs in its database in the United States). TeamCME and Dr. Michael Megeehee, DC are not involved in this request and in no way should be construed as having any other role than as a means of distribution.

Please return this survey at your convenience weekly, biweekly, or monthly to fax number 973-344-5633 or to [geraldane@gmail.com](mailto:geraldane@gmail.com)

What is your registry number \_\_\_\_\_

What state do you primarily perform CDL medical exams? \_\_\_\_\_

Which dates were the numbers collected? \_\_\_\_/\_\_\_\_/\_\_\_\_ to \_\_\_\_/\_\_\_\_/\_\_\_\_

- 1) During the timeframe noted, did you detect elevated blood pressure (blood pressure of over 140/90) in any drivers? Please note the number of CDL holder in which you detected elevated blood pressure (blood pressure of over 140/90)  
\_\_\_\_\_
- 2) From the number of drivers in which you detected elevated blood pressure, did they return to your office with the elevated blood pressure issue resolved? Please list the number of drivers with elevated blood pressure that was resolved after your initial detection \_\_\_\_\_
- 3) During the timeframe noted, did you detect elevated blood sugar in any drivers? Please note the number of CDL holders in which you detected elevated blood sugar  
\_\_\_\_\_
- 4) From the number of drivers in which you detected elevated blood sugar, did they return to your office with the elevated blood sugar issue resolved? Please list the number of drivers with elevated blood sugar that was resolved after your initial detection \_\_\_\_\_

Thank you for your participation in this on-going survey on the role of certified medical examiners in the detection and treatment of elevated blood pressure and blood sugar in CDL holder in the United States.

It is expected that these statistics will eventually be published and will allow us to clarify the role of certified medical examiners as primary points of detection and control of these two public health issues in the United States.
